SWASA PLUS

- PM 0.3 um Filtration
- N95 and FFP2 filtration level
- Highest Breathability and at a low pressure
- 5 layer Filtration Membrane Technology
- Protects from Virus and Bacteria
- UV sterile and Anti germ packing for better protection
- Recommended by doctors at high pollution areas

SWASA CARBON

- Odour less technology to protect from breathing smell/Odour
- PM 0.3 um protection
- N95 and FFP2 filtration level
- Highest Breathability
- 5 layer Membrane Technology for finest particle filtration
- Protects from Virus, Bacteria and bad Smell/Odour
- UV sterile and Anti germ packing for better protection
- Recommended for smokers and other users who are affected by bad smell/Odour

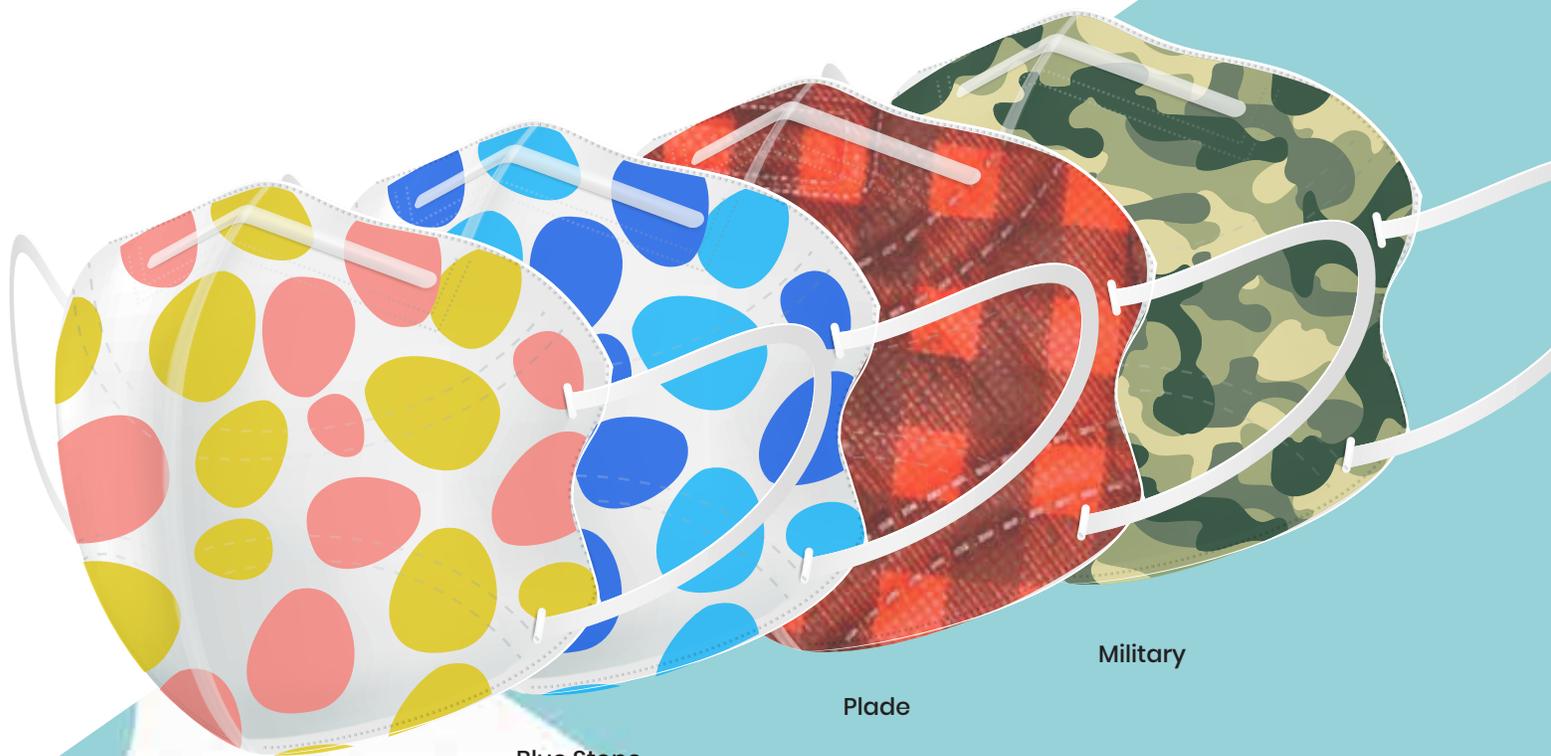

SWASA 3Ply Mask

- PM 2.5 um protection
- FFP2 filtration level
- 3 layer Membrane Technology
- Protects from Bacteria and other pollutants
- UV sterile and Anti Germ packing
- Recommended by doctors for all generation people
- Comfortable breathing
- Most recommended for surgical operations

SWASA Fashion Mask

- PM 0.3 um Filtration
- N95 and FFP2 filtration level
- Highest Breathability and at a low pressure
- 5 layer Filtration Membrane Technology
- Protects from Virus and Bacteria
- UV sterile and Anti germ packing for better protection
- Recommended by doctors at high pollution areas

SWASA Hand Sanitizer

- SWASA Hand Sanitizer kills 99.9% germs by giving instant protection from germs, bacteria and viruses.

60 ML

100 ML

Material Grade

All material being used for the mask construction are OEKO-TEX grade

Layer Chemistry

Layer 1

60 GSM spun bond poly propylene membrane

Layer 2

18 GSM high static melt blown membrane

Layer 3

90 GSM Air condenser membrane

Layer 4

18 GSM high static melt blown membrane

Layer 5

20 GSM spun bond skin protecting layer

Usage

- ▲ High pollution area
- ▲ Uses for solid particulates and mist
- ▲ Always for user instructions and use sin manners as indicated

Do Not Use for

- ▲ DO NOT use for gases and other chemical handling
- ▲ DO NOT use when breathing is very fast
- ▲ DO NOT use when the pressure drop across the membrane is very high
- ▲ DO NOT use when you feel suffocation
- ▲ DO NOT use if the mask is dirty and feel smell
- ▲ DO NOT use if it is used by any other person

Shelf Life and Storage

- ▲ 3 year from the date of manufacturing
- ▲ Store respirator in the original packaging, away from contaminants areas, dust, extreme temperature, excessive moisture and chemical
- ▲ Store in normal temperature
